The state Fire Marshall inspected the Bayfront YMCA about two weeks ago. Learn to Sail leases part of the building from the YMCA, We were instructed to remove all gasoline-powered equipment from the building, and any gasoline containers used for refueling the outboard motors on our safety boats. We propose to buy a steel bin from Ace Hardware, pix enclosed. We also propose to place it on the street facing side of the dumpster enclosure on the west side of the building. According to the Fire Marshall we cannot place it next to the building, which was our original intent. There are no further suitable locations. We ask for prompt approval of this request, since the Fire Marshall has a 30 day window for compliance. we cannot function without fuel for our safety boats, and the power washer which is gas-powered, is essential to removing slime from the ramp.
David Blair, VP Learn to Sail
